Specialities & Interests

Microservices, Continuous Integration and Continuous Delivery (CI/CD), Cloud Services, Software Architecture, Containerization & Orchestration, Agile Development.

Professional Experience

DevOps Engineer - Part-time **Visar Systems AB** **Oct 2026 – Present**
Builds CI/CD pipelines and Docker-based test environments for a Debian-based Linux distribution for high-security environments. Automates builds, tests, and certification evidence (ISO/CE), and works with reproducible builds and secure configuration packages.

AI & Fullstack Developer - Part-time **anotherAI** **Apr 2026 – Present**
Develops and manages an AI-based SaaS service for legal websites with an embeddable AI assistant. Responsible for the full product lifecycle, including architecture, AI integrations, customer interaction, launch activities, and coordination of external developers.

Production Operator - Full-time **Badger Meter** **Jun 2023 – Present**
Industry experience from manufacturing: production processes, quality assurance, and robotic cell support (ABB IRC5).

Frontend Web Developer - Part-time **QUHDock** **Jun 2023 – Jun 2026**
Developed frontend solutions using React and Angular, integrated REST/GraphQL APIs, and worked with responsive design, performance optimization, accessibility, and CI/CD in distributed teams.

Junior Network Engineer **Hitachi Energy** **Dec 2022 – Feb 2023**
Contributed to network migration projects through client management, troubleshooting, documentation, and collaboration with distributed engineering teams.

Education

Blekinge Institute of Technology **Karlskrona, Sweden** **Aug 2024 – Jun 2026**
- **120 ECTS in Web Programming:** Full-stack development with focus on frontend, backend, databases, cloud services, accessibility, and advanced web applications.

Complementary IT Studies **Luleå, Sweden** **Jun 2023 – Jun 2025**
- **IBM Full-stack Development (Jun 2023 – May 2024):** Modern web applications, backend development, AI with Python, microservices, containerization (Docker, Kubernetes, OpenShift), cloud services, and CI/CD.
- **52.5 ECTS at Luleå University of Technology, (Aug 2019 – Jun 2025):** Mechanical engineering, programming, and computer science – CAD (Siemens NX, SolidWorks), FEA (ANSYS), MATLAB, Arduino, embedded systems (Python, C++), C#, web development, databases, and introductory AI.

Noteble Projects

- **AnoAI – AI Legal Tech SaaS:** Embeddable AI assistant for legal websites with an admin dashboard for internal management, customer communication, and intake processes. Developed with focus on AI agents, API integrations, and SaaS architecture.
- **ElSpark – E-bike Rental Application:** Full-stack application for e-bike rentals with real-time data. (React, TypeScript, Node.js, MongoDB, REST API, Nextjs , MERN stack).

Technical Skills

- **Programming & Frontend:** JavaScript (React, Angular, Vue, Next.js), TypeScript, HTML5, CSS3, SASS, Bootstrap.
- **Backend & Databases:** Python (Django, Flask), PHP, Node.js, Express.js, SQL, MongoDB, SQLite, OAuth2.0, MySQL, RESTful APIs.
- **DevOps & Cloud:** Docker, CI/CD (GitHub Actions), Git/GitHub, Microservices, Cloud Computing, Kubernetes, IBM Cloud.
- **Tools & Methodologies:** Postman, Swagger, XAMPP, CMS (Pico), Gitlab Agile (JIRA, Trello).
- **Systems:** Linux, Debian Stable, Ubuntu, WSL, Windows.
- **Certifications:** GitHub Copilot (Microsoft Learning), Docker Essentials, mobile development (iOS/Android), programming, cloud services, and modern technologies from Coursera and CognitiveClass.
