

SPECIALITIES & INTERESTS

Microservices, Continuous Integration and Continuous Delivery (CI/CD), Cloud Services, Software Architecture, Containerization & Orchestration, Agile Development.

PROFESSIONAL EXPERIENCE

AI & Fullstack Developer - Part-time **anotherAI** **Apr 2026 – Present**
Develops and manages an AI-based SaaS service for legal websites with an embeddable AI assistant and admin dashboard. Responsible for the full product lifecycle, including architecture, AI integrations, customer interaction, launch activities, and coordination of external developers.

Production Operator - Full-time **Badger Meter** **Jun 2023 – Present**
Experience within the manufacturing industry with responsibility for production processes, quality assurance, and robotic cell support. Worked with ABB IRC5 robot systems, programming pendant, coordinate systems, safety systems, and basic robot maintenance.

Frontend Web Developer - Part-time **QUHDock** **Jun 2023 – Jun 2026**
Developed frontend solutions using React and Angular, integrated REST/GraphQL APIs, and worked with responsive design, performance optimization, accessibility, and CI/CD in distributed teams.

Junior Network Engineer **Hitachi Energy** **Dec 2022 – Feb 2023**
Contributed to network migration projects through client management, troubleshooting, documentation, and collaboration with distributed engineering teams.

EDUCATION

Blekinge Institute of Technology **Karlskrona, Sweden** **Aug 2024 – Jun 2026**
• **120 ECTS in Web Programming:** Full-stack development with focus on frontend, backend, databases, cloud services, accessibility, and advanced web applications.

International Business Machines **Luleå, Sweden** **Jun 2023 – May 2024**
• **Full-stack Development focused on** modern web applications, backend development, AI with Python, microservices, containerization (Docker, Kubernetes, OpenShift), cloud services, and CI/CD.

Luleå University of Technology **Luleå, Sweden** **Aug 2019 – Jun 2025**
• **52.5 ECTS in technical courses:** Courses within mechanical engineering, programming, and computer science covering CAD (Siemens NX, SolidWorks), 3D modelling, FEA (ANSYS), MATLAB, Arduino, embedded systems (Python, C++), C#, web development, databases, and introductory AI.

NOTEABLE PROJECTS

- **AnoAI – AI Legal Tech SaaS:** Embeddable AI assistant for legal websites with an admin dashboard for internal management, customer communication, and intake processes. Developed with focus on AI agents, API integrations, and SaaS architecture.
- **EISpark – E-bike Rental Application:** Full-stack application for e-bike rentals with real-time data. (React, TypeScript, Node.js, MongoDB, REST API).
- **TechNotes:** Full-stack application with authentication, user roles, and CRUD functionality. (MERN stack).

TECHNICAL SKILLS

- **Programming & Frontend:** JavaScript (React, Angular, Vue, Next.js), TypeScript, HTML5, CSS3, SASS, Bootstrap.
- **Backend & Databases:** Python (Django, Flask), PHP, Node.js, Express.js, SQL, MongoDB, SQLite, OAuth2.0, MySQL, RESTful APIs.
- **DevOps & Cloud:** Docker, CI/CD (GitHub Actions), Git/GitHub, Microservices, Cloud Computing, Kubernetes, IBM Cloud.
- **Tools & Methodologies:** Postman, Swagger, XAMPP, CMS (Pico), Agile (JIRA, Trello).
- **Systems:** Linux, Ubuntu, WSL, Windows.
- **Certifications:** GitHub Copilot (Microsoft Learning), Docker Essentials, mobile development (iOS/Android), programming, cloud services, and modern technologies from Coursera and CognitiveClass.
